PROFESSIONAL PROFILE

•High-achieving Computer Science student with a 9.52 CGPA and a strong foundation in MERN stack and C++. Developed impactful projects like a Spotify Clone and Lane Detection System.Strong problem-solving skills in DSA and a passion for developing scalable web solutions.

Education

•Babu Banarasi Das University *2022-2026*
Btech in Computer Science and Engineering CGPA/: 9.52

•S.D.S.N Public School *2021*
Central Board of Secondary Education Percentage: 93.8

•S.D.S.N Public School *2019*
Central Board of Secondary Education Percentage: 92.2

Personal Projects

•Real-Time Advanced Lane Detection System

- Tools & technologies used:C++, OpenCV, Node.js, React.js, Batch Scripting
- Core Vision Engine: Developed a high-performance computer vision pipeline using C++ and OpenCV (Canny Edge Detection, Hough Transform) for real-time lane tracking.
- Full-Stack Integration: Engineered a robust bridge utilizing a Node.js REST API to connect the high-compute C++ backend with a dynamic React.js frontend control panel.
- System Automation: Created a custom Windows Batch script (.bat) to automate the initialization sequence, concurrently launching all microservices with a single command.
- Project Link: https://github.com/Preeti-Verma04/Real-Time-Lane-Detection.git

•Face Detection System (C++ & OpenCV)

- Developed a real-time face detection system using **C++** and **OpenCV** library.
- Implemented **HaarCascade Classifier** for accurate face recognition on live webcam feed.
- Configured project in **Visual Studio 2022** with proper integration of OpenCV.
- Demonstrated ability to work with image processing, computer vision concepts, and C++ development.
- Project Link: github.com/Preeti-Verma04/FaceDetection-CPP

•Spotify Clone - Full Stack Music App

- Tools & technologies used: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Multer, JWT
- Developed a Full-Stack music streaming app with a professional Spotify-inspired UI.
- Built a Media Upload System using Multer to handle audio files and cover images simultaneously.
- Integrated JWT Authentication for secure user login and artist role-based access.
- Designed a Responsive Music Player with real-time controls (Play/Pause, Volume, Seek).
- Project Link: https://github.com/Preeti-Verma04/Spotify-clone.git

Technical Skills and Interests

Languages: C, C++, HTML, JavaScript
Relevant Coursework: Data Structure and Algorithms, Object Oriented Programming, Database Management System, Operating System
Developer Tools: Tailwind(CSS), React js, node js, Express js, Github, AWS
Cloud/Databases: MySQL, MongoDB

Certification

•Data Structure and Algorithm in C++ ,Apna College *June 2025*

•AWS Learnovate Enterprises *July 2025*

• **Web Development** Apna College *Dec 2025*

Achievements

- **Research Paper** •Presented my research paper titled Impact Analysis of Industrial Growth Using AI on International Conference on AI in Digital Growth (ADG-2025) *April 2025*
- **Soft Skill Training** •Organised by Learnovate Enterprises held in BBDU *Mar-25,Nov-24*
- **Kho-Kho competition**•Winner in Utkarsh fest organised by BBDU *Feb 2025,2024*
- **Kho-Kho competition**•Winner in kho-kho in fest organised by RGIPT, Amethi *Feb 2024*
- **Khelo-India**•Participated in Khelo-India as a Volunteer held in Babu Banarasi Das University *May 2023*
- **Hackathon**•Participated in Hackathon held in Babu Banarasi Das University *Sep 2024*
